

Extreme 1543 DAC

“1” ---- Adjustable resistance, Adjustment of the OPAMP negative supply (IC 4PIN voltage),the factory adjusted to -15V.

“2” --- Adjustable resistance, Adjustment of the OPAMP positive supply (IC 7PIN voltage),the factory adjusted to +15V

“3” --- Adjustable resistance, Adjustment of the TDA1543 VDD Voltage (TDA1543 5PIN),the factory adjusted to +7.5V

“4” ---Switch, All Bit for “ON” Choosing the Right Crystal For Your Oscillator, Please turn off the power after, changing this Switch .
